- power cord for for 240V

ⓘ <http://www.mcubed-tech.com/forum/>

ATTENTION: if the amplifier is connected with a laptop only, then you have to switch it on and off with the help of any available 12V PSU (not part of the delivery content). To avoid a blob when USB connection to amplifier is activated, please activate 5V permanent power to the USB ports on the PC (USB wake up in the BIOS or jumpers near the USB ports)
